

DELECTA'S POME FRUIT DIVISION

Delecta Fruit carefully selects production areas with climatic conditions suitable for optimum apple and pear production. Long shelf life and excellent eating sensation are two features associated with the Delecta brand.

The Delecta pack ensures our apples and pears are shipped to arrive in the best condition. Delecta spend time with growers in our orchards to ensure fruit is picked and packed at optimum maturity. Packaging compliments our fruit and we innovate constantly to improve packaging and to reduce packaging costs.

Food Safety, temperature control and traceability are managed on micro level.
