

DELECTA'S CITRUS FRUIT DIVISION

Delecta Fruit provides the full range of citrus to our clients throughout the South African production season, starting with the earliest production area near the Zimbabwean border in the North and finishing in the Citrusdal area in the Western Cape, in the South.

The dry and hot climate of the Western Cape ensures we supply black spot free citrus from this area.

Our in-house logistics department handles the entire shipping process from beginning to end. Excellent relationships with the transporters and shipping lines, ensures that Delecta can deliver outstanding service to our clients, while being cost-effective. We are flexible with special requests in terms of markets, and accommodate our clients wherever we can.

Our technical team manages the quality of the citrus by regularly visiting producers and packing facilities and implementing client specific standards. The Delecta brand is associated with consistent quality, packed specifically per order and per client.
